

RenaPlus is potassium gluconate for use as a supplement in potassium-deficient states in cats and dogs. Available in powder, tablets or gel for easy administration. Do not administer to animals that have diseases where high potassium levels may be encountered, such as severe renal insufficiency or adrenal insufficiency. Use with caution in patients that have cardiac disease, particularly in digitalized patients or those with renal disease.

ITEM#	DESCRIPTION	SIZE
501060	RenaPlus Gel	5 oz
502060	RenaPlus Powder	4 oz
