

# KetoHex™ Product Line

These antiseptic (antibacterial and antifungal) products are designed for topical use on dogs, cats and horses to treat skin conditions that are responsive to chlorhexidine and ketoconazole. Four different presentations allow you to choose the most appropriate or convenient delivery method for each patient.

- **KetoHex™ Flush:** For topical cleansing of puncture wounds, lacerations and abrasions, as well as superficial skin infections. Chlorhexidine gluconate 0.2% and ketoconazole 0.2% in a solubilizing vehicle.
- **KetoHex™ Shampoo:** Pleasantly scented shampoo designed for deep cleaning and deodorizing. Chlorhexidine 2%, ketoconazole 1%.
- **KetoHex™ Spray:** Alcohol-free formulation also contains essential fatty acids and Vitamin E to nourish the skin and further control irritation. Chlorhexidine gluconate 2%, ketoconazole 1%.
- **KetoHex™ Wipes:** Can be used for the antiseptic cleansing of face folds and finger folds as well as underarm and groin areas. Chlorhexidine 20 mg and ketoconazole 17 mg (per wipe) in an alcohol-based solution.
