

Microscopes

High-quality, affordable VetOne microscopes with Seidentopf binocular heads offer precise mechanical stage movement, optical clarity, flat field and multiple design features that enhance user comfort.

The G380 series features standard 10X High-Eyepoint eyepieces that are engineered to reduce eyestrain for users wearing glasses. Each eye tube has an independent focusing diopter adjustment to compensate for the natural vision differential between each eye. The G380 is available with Achromat (G380) or Semi-Plan (G380SP) objectives.

All models include two extra fuses. All models carry a 5-year limited warranty that excludes bulbs and fuses.
