

Potassium Citrate Granules

Potassium Citrate Granules help to prevent the formation of calcium oxalate urinary stones in cats and dogs. Highly palatable, easy to administer liver and roast beef-flavored granules contain microencapsulated potassium citrate for convenient once-a-day administration to animals of any age. Each 5-gram scoop contains 300 mg potassium citrate and 423 mg total Omega 3 fatty acids (as glycerides). Mix with or sprinkle on food. Made in the U.S. with 100% U.S.-sourced ingredients.
