

PowerSpin™ BX Centrifuge

The state-of-the-art design incorporates advanced safety features such as Zero RPM Lid Lock and Auto Unbalance Detection, Automatic Rotor Recognition, and Shutdown. The built-in oversized LCD display provides you with real-time data. With the push of a button, you can speed up or slow down the rotor within a 1000 to 13000 RPM range (max. 6000 RPM with the Blood Tube Rotor). The maintenance-free brushless DC motor is powerful and super-quiet. The cover of the microhematocrit rotor incorporates a reader, allowing for instant reading and eliminating the need for additional specimen handling. Comes with two rotors, a 6-place fixed angle blood tube and a 24-place microhematocrit, and a starter pack of one dozen 12-mL conical tubes.

- Variable speed up to 13000 RPM
- Digital timer (0–99 minutes)
- Detachable power cord with fuse holder in plug housing
- Chemical-resistant exterior that is and easy to clean and disinfect
- Lid window for strobe tachometer RPM check
- Standard 115V/60Hz (220V/50Hz option available)
