

Sterilization Pouches

VetOne® Sterilization Pouches are produced from the finest surgical grade paper together with a multi-layer fracture-free tinted blue film, which provides a clean fiber-free peel. The self-seal adhesive tape has been tested in all sterilization atmospheres in order to ensure a 100% fail-resistant seal. Our autoclave/chemical three parameter indicator ink conforms to the latest ISO requirements. These self-sealing pouches can be used with ethylene oxide or steam.
